How to Install test sample		
Peel off a small part of the sample lid and place the sample on the table	Clump the sample lid with the sample chuck	Place the sample chuck cord around the roller of the table and hook the end to the chuck cord to the Force gauge
		

Specifications	
Model	P45-50N
Maximum Capacity	50N
Maximum sample size	Height:10-100mm Diameter:20-140mm
Dimensions	as diagram in page 4/4
Weight *1	Sample grip: approx.10g Table: approx.1500g
Mountable Test Stand *2	MX-500N-L, MX-1000, MX2-500N-L, MX2-1000N, HV-500 II -L, HV-1000N

* Possible testing area varies depending on the size of the packages

* This testing kit does not cater for full opening test. Custom- made order is available for full opening test. Please refer to page 3/4.

* Original testing kit can be customized to your measuring requirement

* Standard small hook (A-1/S-1/SR-1) is required for this test.

*1 When selecting the force capacity, weight of the chuck must be included to the force gauge load.

*2 Please contact us for other testing stands installment

Examples of Product Configuration P45-50N	
Example1 Code : 1P2010A - simple 45-degree peel test up to 50N Digital force gauge : DST-200N Motorized Test Stand : MX-500N-L Optional attachment : P45-50N *2	
Example2 Code : 1P2010B - Functional 45-degree peel test up to 50N Digital force gauge : ZTS-100N Motorized Test Stand : MX2-500N-L *1 Optional Motorized Test Stand : -V600 Optional Attachment : P45-50N *2 Optional Cable : CB-528	

Example2 Image

* Please refer to the specification of each product for details.

* Product configuration varies depending on the shape and characteristic of the sample and measurement conditions

* The recommended capacity of the force gauge varies depending on the expected force to be loaded.

* Custom-made order is available for **JIS S0021-2:2018** 「Packaging-Accessible design-Ease of opening」 and **ISO17480:2015** 「Packaging -- Accessible design -- Ease of opening」 (**Full Opening test**) Please refer to page 3/4.

*1 MX2 series test stands are recommended with appropriate moving speed for 45-degree angle peel test.

*2 With the possibilities of liquid splashing, while testing, use of the Tray PTW-10IN (not included in the kit) is recommended.

Related Accessories and Jigs (available separately)		
Tray PTW-10IN Tray is to be fixed under the testing kit for splash protection when measuring liquid product packaging 	Beverage Can Tab pulling force testing kit PTD-100N For measuring pulling force of the stay-on-tabs on the beverage cans 	Food Can Tab pulling force test kit PTF-100N For measuring easy open pull tabs: pulling and opening 
Screw Cap Torque tester DTXS/DTXA Series For bottle screw caps torque force measurements: Opening and Closures 	Food Texture analyzer FRTS-5N/50N/100N For evaluation of the textural property variations with simple touch screen operation. 	Food Hardness Testing Unit FCA-DSV-50N For measurement of food hardness by simple operation. 

[Custom-made Kit (made to order) for full opening test]

For ISO17480:2015 「Packaging -- Accessible design -- Ease of opening」 and (Corresponding Japanese standard: JIS S0021-2:2018) (corresponding part only) *Please contact us for the custom-made Kit
